

## AI Use Declaration Form

**Course:** Introduction to Artificial Intelligence

**Lab Title:** Lab 2

**Student Name:** Kofi Asante Gyamebi

**Student ID:** 02522028

**GitHub Repository Link:** <https://github.com/kgyamebi/lab-2-predictive-analytics.git>

**Date Submitted:** 03/7/26

### 1. AI Use Summary

| Question                                            | Student Response |
|-----------------------------------------------------|------------------|
| Did you use any AI tool for this lab?               | Yes              |
| Estimated percentage of the work influenced by AI   | 10 %             |
| Did you attach evidence of AI use where applicable? | Yes              |

### 2. Details of AI Use

Complete the table below for each AI tool used. Add more rows where necessary.

| Name of AI Tool Used | Purpose for Using the Tool                             | Prompt or Instruction Given to the Tool                                      | Part(s) of the Work Influenced by the Tool | How I Verified, Edited, or Improved the AI Output |
|----------------------|--------------------------------------------------------|------------------------------------------------------------------------------|--------------------------------------------|---------------------------------------------------|
| Copilot              | Debugging                                              | "Find errors in the code" it's not running"                                  | Section:1,2,3                              | Code ran without error                            |
| Copilot              | Virtual environment creation                           | Error saying python not installed how do I fix this                          | Section:1,2,3                              | Ai helped create the environment                  |
| Copilot              | How to push to github                                  | Need help creating my virtual environment                                    | Section:1,2,3                              | Was able to push to github                        |
| copilot              | Evaluating the Relationships,for the student reasoning | "what are the missing values,relationship between data, are the data skewed? | Section:1,2,3                              | Gave detailed answers to relationhio in the data  |

### 3. Attachment of AI Output Evidence

Where required, attach evidence of AI use. Tick all that apply. Add more rows where necessary.

| Evidence Type                         | Attached?<br>(Yes, No,<br>N/A) | File Name |
|---------------------------------------|--------------------------------|-----------|
| AI-generated draft                    |                                |           |
| Prompt history                        |                                |           |
| Screenshot of AI interaction          | Yes                            |           |
| Exported AI conversation              |                                |           |
| AI-generated code snippet             | yes                            |           |
| Revised version showing student input |                                |           |

 Give feedback

Explain what a right-skewed distribution means using my tip\_amount histogram.

 Copilot

Using your taxi dataset, a right-skewed distribution of tip\_amount means that:

- Most passengers left small to moderate tips.
- A smaller number of passengers left very large tips.

How do I come up with useful engineered features on my own?

Copilot

A good data scientist usually creates engineered features by asking:

"What factors might influence the thing I'm trying to predict?"

In your taxi assignment, you're predicting:

which split is most efficient what split should I use

Copilot

For your lab, the most appropriate split is:

</> Plain Text

1 60% Training

2 20% Validation

3 20% Test

Why?

• Training set (60%): Used to teach the model patterns.

• Validation set (20%): Used to compare models and tune settings.

explain  
RMSE and R<sup>2</sup>

Plain English

Mean Squared Error answers:  
"age, how far are my predictions from the correct answer?"

assignment:

Copilot

Your screenshot shows my explanation, but here's an even simpler way to remember it for exams and interviews.

RMSE = "How wrong am I?"

Imagine you're predicting taxi tips

#### 4. Student Declaration

I declare that:

| Declaration Statement                                       | Response (Yes/No) |
|-------------------------------------------------------------|-------------------|
| The submitted work is my own work.                          | Yes               |
| Any use of AI tools has been clearly declared in this form. | Yes               |

|                                                                                           |     |
|-------------------------------------------------------------------------------------------|-----|
| The prompts, instructions, and AI-generated outputs have been disclosed where applicable. | Yes |
| I reviewed, tested, edited, and improved any AI-generated content before submission.      | Yes |
| My AI usage does not exceed 25% of the entire work.                                       | Yes |
| I understand that undeclared or excessive AI use may be treated as academic misconduct.   | Yes |
